FOR IMMEDIATE RELEASE

**FLEXON, INC. INTRODUCES SPEED-MASTER® 4500
HIGH PERFORMANCE DOOR
FOR EXTRA LARGE DOORWAYS**

On April 3, 2007, Flexon, Inc. introduced the Speed-Master® Model 4500. This high performance door is designed for extra large, interior or exterior doorways, up to 27' wide X 25' high, common at airports; hangers; mass transit facilities; train and boat garages; and other industrial manufacturing plants.

The Speed-Master® 4500 boasts the same reliable, low-maintenance features as Flexon's other Speed-Master® high speed roll-up doors:

- Direct-drive motor/gearbox, rated at 360 operations/hour with 5-Year unlimited cycle warranty.
- Exclusive Flex-Logic® interactive control box.
- Low-profile heavy-duty, impact-resistant steel side tracks.
- Bulldog XT panel material with full-width vision areas.

In addition, the Speed-Master® 4500 is equipped with Flexon's patented sectional panel design featuring integral, extra large, anodized aluminum hinge profiles, which function as built-in wind-bars. This door is a cost-effective replacement for conventional overhead doors.
