SPEED-COMMANDER™ 1400 SE SELF-REPAIRING DOOR NEW FROM HÖRMANN FLEXON

Hörmann Flexon LLC formally launched the Speed-Commander™ 1400 SE high performance door in July 2008.

The Speed-Commander™ 1400 high speed roll-up door, designed for use on interior openings up to 14'0" wide X 16'0" high, has an impressive opening speed of up to 100" per second which promotes effective material handling and contributes to energy savings. In case of a collision, the incredibly flexible panel breaks out of the guide tracks, and the simple, self-repairing design requires just the push of a button, and with no need for tools, the door is again operational. A unique, vertically flexible SoftEdge profile minimizes damage to goods and greatly reduces risk of injury to personnel. Whisper quiet operation is achieved with horizontal spring steel panel stiffeners, accommodating in-plant negative or positive pressure conditions.

Hörmann Flexon LLC, Leetsdale, PA, manufactures a complete line of industrial door and loading dock products including the Speed-Master® Series of high performance, high speed roll-up doors; Flexidoor® Series of impact doors; Flexidock® loading dock equipment and Screen-Master® insect control barriers.

Contact Hörmann Flexon today for the new Speed-Commander™ brochure, now available.
