Quick Connect™ HFC1 • Many practical features you will benefit from.

QUICK CONNECT™ HFC1 CONTROL BOX

Smart Pre-Wiring
Reduces Installation Time

Easy Troubleshooting
Reduces Downtime

Trusted Two Year
Warranty

Convenient, easy installation reduces installation time

Smart pre-wiring of electrical cables to control box enables quick and easy installation. Simply plug and twist the cable connectors to designated receptacles on the bottom of the control box.

Sound, long term investment

Fourth generation German technology, proven worldwide, provides product sustainability companies want.

Durable product with long service-life

24/7 watchdog surveillance system of electrical operations provides protection from power surges, avoiding damage to the door system.

Trouble-free & reliable

Frequency inverter design with soft start and soft stop means minimal wear and tear on the door system for a long, reliable motor life.

Easy trouble-shooting

Accurate, self-diagnostic LCD display quickly identifies the type of malfunction, and user-friendly diagnostics reduce down-time.

Easily fits into areas with limited space

Compact overall dimensions of 12" wide x 16" high x 5" deep accommodate even applications with limited wall space.

Proven system

UL-approved control box is dependable and proven.

Can be installed in most applications

NEMA 4 rated enclosure with standard power requirement of 460v or 230v / 3 phase / 60 HZ accommodates a wide variety of applications.

Convenient

A wide choice of activations are available for use with the system: Electric pull cord, push button, induction loop detector, radar/motion detector, remote control. Consult the factory for use of non-Hörmann Flexon activations.

Safe

Quick disconnect ensures safety if necessary to quickly remove power from the door.

Peace of mind

Our solid product warranty and promise as a manufacturer that you can trust our products to be there for many years to come.
